Quality is an inseparable element of all activities carried out at Gulf Extrusions. Gulf Extrusions is dedicated to respond and deliver on time, high quality, tailor-made and cost effective products. The management and staff are committed to implement a comprehensive and integrated Quality Management System in accordance with the International Quality Standards of ISO 9001 and ISO 14001.

INTERNATIONAL STANDARD COMPLIANCE

Extrusions Dimensions Tolerances:

- BS:1474 (amended version – consists of BS EN 755 Series)
- DIN 1748, DIN 17615
- ASTM B221

Powder Coated Finish:

- BS:6496 Clause: 10.4, 10.5, 10.6, 10.7 & 10.8
- ISO 2360 / 2813 / 2409 / 2931
- Minimum Film Thickness – 60 Microns

Anodizing Finish:

- BS EN 12373-1 2001 Clause 7 (BS:6161 Part 6)
- BS:3987 Clause 2, 3, 5, 6
- Appendix- A, B, C, D, E, F, G, H, J, K, L Minimum Film Thickness- 16 Microns

PRODUCT QUALITY CERTIFICATES

Qualicoat (European Powder Coaters Association):

- A quality label for coating on metal for Architectural Applications
- A product license under the control of EWAA (European Wrought Aluminium Association) in Zurich Switzerland

Qualanod (European Anodizers Association):

- A quality label organization to guarantee high quality Aluminium Anodizing.
- A product license under the control of EWAA (European Wrought Aluminum Association) in Zurich Switzerland

- SASO

- ESMA

Management:

- ISO 9001 (Quality Management System)

- ISO/TS 16949:2009 (Management System)

Environment:

- ISO 14001 (Environment Management System)

Membership in International Organization:

- AAC member (Aluminium Anodizers Council - USA)
- AEC member (Aluminum Extruders Council - USA)
- DIN EN 15088

ANODIZING

A wide range of anodizing treatment options are possible for the aluminium profile sections of this system. The color choices from Gulf Extrusions range from Natural, Gold, and Bronze to Spectro colors (Red, Blue, Green, and Gray).

This surface treatment process involves first pre-treatment with scotch brite brushing for the unfinished profiles, and then subsequently fully immersing the aluminium profiles in an acidic electrolyte solution through which electric current is passed creating an anodic film on the profiles ranging from 5-30MICs.

The process is guaranteed and certified for use by QUALANOD - A quality label Organization to guarantee high quality aluminium anodizing and the company's ISO 9001 certification.

POWDER COATING

- Horizontal & Vertical Powder coating lines with an Annual Capacity of 24 000 MT
Powder Coating BS: 6496 Clause: 10.4, 10.5, 10.6, 10.7, & 10.8
ISO 2360/2813/2409/2931
Minimum Film Thickness - 60 Microns

A wide choice of colors for powder coating can be used for the aluminium profile sections.

From Gulf Extrusions the following powder types are available

- Polyester Façade (PE-F)
- Super Durable Façade (SDF) & Hyper Durable Façade (HDF) (Where SDF & HDF are equivalent to Poly-Vinylidene DiFluoride (PVDF) in terms of corrosion performance)
- Anti Bacterial (recommended to be used in Hospitals)
- Anti Static (recommended for laboratories, electronics assembly buildings) and Heat Resistant in nature.

This surface treatment process involves the following pre-treatment

1. Degreasing
2. Washing
3. Etching
4. Washing
5. Chromatising
6. Double washing in dematerialized water

Once completed, powder is applied using an electrostatic spraying process with charged powder particles, followed by curing in an oven under a controlled temperature of 180-200C for paint polymerization where the paint layer is at least 60mic.

This whole process is certified for use from QUALICOAT - A quality label for coating on metal for Architectural Applications.

GUARANTEE PERIOD:
10 years for PE-F Quality
25 years for PE-SDF

INTRODUCTION TO THE SYSTEM

The 45mm Gulf Ex. Hinged Series is a design concept to combine esthetics and performance. Full solution package is supported to fulfill the requirements to cover the needed applications. It is designed for heavy duty use according to the American National Standard. The results have been impressive.

All profiles are available in all colors in order to meet today's modern architectural requirements. For better performance of the system, alignment cleats for the frame and shutter are used.

Specially designed EPDM Gaskets are made available with the system to enhance the performance and create easy assembly. Other accessories such as rollers and handles come as part of the system.

Sections:

The sections in Gulf Extrusions line are produced by extruding aluminum on a wide range of presses starting with 800 tons to 4400 tons press. They are made of aluminum alloy 6060, 6063, 6082 and 6005 according to British Standard Specification for extrusion Dimension Tolerances BS EN 755-9:2008 and BS EN 12020-2:2008.

Frame:

Strong cross sectional profile of 45mm, a wide range of frames are available to suit most of the required applications in the building codes.

Sash:

Tubular straight, elegant and stylish of 52mm width. A wide range is available to cover all the needed applications and glass thickness.

Assembly:

Assembly of the frames is done by 45° cut same as the sashes at a custom 45° cut. All of the mounting components are made of aluminum.

Glazing:

Standard or isolating from 4 to 28mm, maintained by two EPDM joints and bead clipped at a minimum height of 22 mm (back of groove)

Bead must be on the inside of the installation.

The System consists of a different frame and different sash profile that will be used on the four sides, where this system provides the options for inward and outward opening.

The System covers arch shapes, louvers, pivot windows and swing doors.

Company Comments (if any):

* Eastern Meranti Solid Core wooden door - 4.5cm thickness

* Selected color shade to be used as marked on sample

Eastern Meranti SolidCore Wooden Door

Eastern Meranti SolidCore Wooden is a highly sought after tropical hardwood used in the construction industry for its excellent durability, strength, and resistance to decay. This beautiful wood species is known for its distinctive reddish-brown color and its ability to withstand harsh weather conditions. Description

Eastern Meranti SolidCore Wooden Door is a multi-purpose door ideal for internal and external use in industrial, commercial and residential applications. It features timber rails used to form a frame around material options ranging from polystyrene and MR particleboards to external grade HMR. Varying finishes provide a professional look while maintaining functionality, durability and security.

Application

Warehouses, basement offices, schools, maintenance facilities, hospitals, residential units, shopping centres

Finishes

The standard finish is chiboard. Other finishes available include veneer and Metal sheets with thicknesses up to 1.5mm can be used to increase durability and security.

Specification

Size (Standard)	as Per Client Approval Sizes (Customized)
Design	as Per Sample Approved (Customized)
Finish	chiboard. Other finishes available include veneer and Metal sheets with thicknesses up to 1.5mm can be used to increase durability and security.
Weight	40KG - 50 KG
Frame	Eastern Meranti 100% Solid Wooden 4.5 CM Thickness, Articave 100 % Solid Wooden 7 CM X 1.8 CM Thickness
Shutter	Eastern Meranti Solid Wooden chiboard 4.5 CM Thickness, Other finishes available include veneer and Metal sheets with thicknesses up to 1.5mm can be used to increase durability and security.
Color	as Per Color Sample Approved
Surface	Natural Wood Veneer with Painted
Open Style	Swing / Sliding as approved
Accessories	Italian (Locks, Hinges, Rubber Seal, Handle, ETC)
Packing	Polythene Sheet 500g inside, Strong Paper outside.
